

Website & Hosting

No matter where your business is going on the Web, MyIntellects Website & Hosting solutions will get you there. From registering a domain name and launching a Web site to attracting customers with fully managed online marketing campaigns, we've got everything you need to launch and grow your online presence.

We offer wide range of managed hosting services. This is essentially to free you from dealing with a separate service provider for hosting your website or online application. The hosting platforms we provide are purely running on Linux which guaranteed an uptime according to Industry Standards. The denomination of space availability is completely as per your expected usage requirements, which could start from as low as 50MB and go upto 5 GB of webspace. The packages we offer also include Email Solutions for your organizations.

The features offered for these solutions include:

- POP/SMTP and IMAP services
- Webmail facility
- HTML editor
- Enhanced search functionalities
- Extendible attachment sizes
- Highly effective Spam filters and Anti Virus systems
